Patent Number:

6,037,922

Date of Patent:

Mar. 14, 2000

## OPTICAL MODULATION OR IMAGE DISPLAY SYSTEM

Inventor: Mineto Yagyu, Sagami-hara, Japan

Assignee: Canon Kabushiki Kaisha, Tokyo, Japan

Appl. No.: 08/661,958

Filed: Jun. 12, 1996

### Foreign Application Priority Data

Jun. 15, 1995 [JP] Japan 7-148793  
Jun. 16, 1995 [JP] Japan 7-150280

### ABSTRACT

An optical modulation unit is constituted by a light source periodically turned on, and an optical modulation means including an optical modulation element and periodically turned on. The optical modulation unit is driven by changing a voltage applied to the optical modulation element depending on given gradation data so as to modulate an overlapping time between an ON period of the optical modulation means and a lighting period of the light source. The gradation data may be analog gradation data and may be carried by light illuminating the optical modulation element synchronized with a voltage applied to the optical modulation element.
